A–level
MATHEMATICS

Paper 2

Wednesday 10 June 2020   Afternoon   Time allowed: 2 hours

Materials
- You must have the AQA Formulae for A-level Mathematics booklet.
- You should have a graphical or scientific calculator that meets the requirements of the specification.

Instructions
- Use black ink or black ball-point pen. Pencil should only be used for drawing.
- Fill in the boxes at the top of this page.
- Answer **all** questions.
- You must answer each question in the space provided for that question. If you need extra space for your answer(s), use the lined pages at the end of this book. Write the question number against your answer(s).
- Show all necessary working; otherwise marks for method may be lost.
- Do all rough work in this book. Cross through any work that you do not want to be marked.

Information
- The marks for questions are shown in brackets.
- The maximum mark for this paper is 100.

Advice
- Unless stated otherwise, you may quote formulae, without proof, from the booklet.
- You do not necessarily need to use all the space provided.

Section A

Answer **all** questions in the spaces provided.

1   Which one of these functions is decreasing for all real values of x?

Circle your answer.

[1 mark]

$$f(x) = e^x \qquad f(x) = -e^{1-x} \qquad f(x) = -e^{x-1} \qquad f(x) = -e^{-x}$$

2   Which one of the following equations has no real solutions?

Tick (✓) **one** box.

[1 mark]

$\cot x = 0$ ☐

$\ln x = 0$ ☐

$|x + 1| = 0$ ☐

$\sec x = 0$ ☐

3 Find the coefficient of x^2 in the binomial expansion of $\left(2x - \dfrac{3}{x}\right)^8$

7 a and b are two positive irrational numbers.

The sum of a and b is rational.

The product of a and b is rational.

Caroline is trying to prove $\dfrac{1}{a} + \dfrac{1}{b}$ is rational.

Here is her proof:

Step 1 $\dfrac{1}{a} + \dfrac{1}{b} = \dfrac{2}{a+b}$

Step 2   2 is rational and $a + b$ is non-zero and rational.

Step 3   Therefore $\dfrac{2}{a+b}$ is rational.

Step 4   Hence $\dfrac{1}{a} + \dfrac{1}{b}$ is rational.

7 (a) (i)   Identify Caroline's mistake.

[1 mark]

Section B

Answer **all** questions in the spaces provided.

10   A vehicle is driven at a constant speed of $12\,\mathrm{m\,s^{-1}}$ along a straight horizontal road.

Only one of the statements below is correct.

Identify the correct statement.

Tick (✓) **one** box.

[1 mark]

The vehicle is accelerating ☐

The vehicle's driving force exceeds the total force resisting its motion ☐

The resultant force acting on the vehicle is zero ☐

The resultant force acting on the vehicle is dependent on its mass ☐

11   A number of forces act on a particle such that the resultant force is $\begin{pmatrix} 6 \\ -3 \end{pmatrix}$ N

One of the forces acting on the particle is $\begin{pmatrix} 8 \\ -5 \end{pmatrix}$ N

Calculate the total of the other forces acting on the particle.

Circle your answer.

[1 mark]

$\begin{pmatrix} 2 \\ -2 \end{pmatrix}$ N $\begin{pmatrix} 14 \\ -8 \end{pmatrix}$ N $\begin{pmatrix} -2 \\ 2 \end{pmatrix}$ N $\begin{pmatrix} -14 \\ 8 \end{pmatrix}$ N

12   A particle, *P*, is moving with constant velocity $8\mathbf{i} - 12\mathbf{j}$

A second particle, *Q*, is moving with constant velocity $a\mathbf{i} + 9\mathbf{j}$

Q travels in a direction which is parallel to the motion of *P*.

Find a.

Circle your answer.

[1 mark]

Turn over ▶

13   A uniform rod, *AB*, has length 7 metres and mass 4 kilograms.

The rod rests on a single fixed pivot point, *C*, where $AC = 2$ metres.

A particle of weight W newtons is fixed at *A*, as shown in the diagram.

The system is in equilibrium with the rod resting horizontally.

13 (a)   Find W, giving your answer in terms of g.

[2 marks]

_____

_____

_____

_____

_____

_____

13 (b)   Explain how you have used the fact that the rod is uniform in part **(a)**.

[1 mark]

_____

_____

_____

14 At time t seconds a particle, P, has position vector **r** metres, with respect to a fixed origin, such that

$$\mathbf{r} = (t^3 - 5t^2)\mathbf{i} + (8t - t^2)\mathbf{j}$$

14 (a) Find the exact speed of P when $t = 2$

15 A particle is moving in a straight line with velocity $v\,\mathrm{m\,s^{-1}}$ at time t seconds as shown by the graph below.

15 (a) Use the trapezium rule with four strips to estimate the distance travelled by the particle during the time period $20 \le t \le 100$

[4 marks]

_____

_____

15 (b)   Over the same time period, the curve can be very closely modelled by a particular quadratic.

Explain how you could find an alternative estimate using this quadratic.

[1 mark]

_____

_____

_____

Turn over for the next question

Turn over ▶

16 Two particles *A* and *B* are released from rest from different starting points above a horizontal surface.

A is released from a height of h metres.

B is released at a time t seconds after *A* from a height of kh metres, where $0 < k < 1$

Both particles land on the surface 5 seconds after *A* was released.

Assuming any resistance forces may be ignored, prove that

$$t = 5(1 - \sqrt{k})$$

Fully justify your answer.

Do not write outside the box

18 Block *A*, of mass 0.2 kg, lies at rest on a rough plane.

The plane is inclined at an angle θ to the horizontal, such that $\tan \theta = \dfrac{7}{24}$

A light inextensible string is attached to *A* and runs parallel to the line of greatest slope until it passes over a smooth fixed pulley at the top of the slope.

The other end of this string is attached to particle *B*, of mass 2 kg, which is held at rest so that the string is taut, as shown in the diagram below.

18 (a) *B* is released from rest so that it begins to move vertically downwards with an acceleration of $\dfrac{543}{625} g \, \mathrm{m\,s^{-2}}$

Show that the coefficient of friction between *A* and the surface of the inclined plane is 0.17

[8 marks]

Turn over ▶

18 (b) **In this question use $g = 9.81\,\mathrm{m\,s^{-2}}$**

When *A* reaches a speed of $0.5\,\mathrm{m\,s^{-1}}$ the string breaks.

18 (b) (i) Find the distance travelled by *A* after the string breaks until first coming to rest.

[4 marks]
